

## 助剂产品明细 Additive product details

产品型号 Product Name	类型Application	固含 %Active matter	产品特性Special Features	作用Benefits	使用说明How to use
CDI-183	水油通用润湿分散剂 Universal dispersant	100	用于通用色浆、油墨，零 VOC，适用范围广，可用于各种无机、有机颜料和填充料，通用性好 Wetting and dispersing additive for universal colorants For universal pigment concentrates for both water borne and solvent borne system 100% active matter It has a good compatibility with different kind of resins.	通过空间位阻稳定作用而使颜料解絮凝； 高光泽，展色强； 大幅降低色浆粘度，改善色浆流动性，并能提高色浆颜料的含量； 提高透明颜料的透明度和不透明颜料的遮盖力； 应用范围广，对无机、有机颜料和填充料都有很好效果。 By steric stabilization, the additive can deflocculates and stabilizes the pigments effectively Achieve high level of gloss and colour strength Reduce viscosity, increase flowability of the pigment concentrate and pigment loading Improve transparency; improve hiding power Broad compatibilities; work for inorganic and organic pigments	先将产品在树脂中溶解好，再加入颜料研磨 Dissolve product in resin well before adding pigments for grinding
